📍 Cond. Malaga Park Guaynabo P.R

Objective

Maintain High-Level performance professionally in the industry of programming. Keep pushing myself and learn even more every single day to make excellent capable work for clients, employers and the company.

Experience

Holberton School 2021 - Present

AirBnB Clone

Recently had my AirBnB clone in which I had to learn to deal with databases (MySQL), JavaScript, HTML, CSS and python to make it. Create a console to interpret classes that interact with the database and JSON storage.

Simple Shell

Create from scratch a command-line interpreter that works like a shell would. Handle interactive and non-interactive mode. Does not have memory leaks and prints a command once the interpreter receives the user input.

Education

May 2022-Present
Holberton School P.R
Software engenieer
- foundations

About to graduate from a 9-month program focused on the foundations of programing, computer science and software engineering. In this program we have learned to create websites from scratch and navigate databases.

August 2021-2021
University of Puerto Rico - Bayamon
Bachelor's in
Computer Science

Attended one semester in the curriculum for Computer science in UPR Bayamon. Here I was introduced to JavaScript and Python as my first languages in programming. Not the greatest experience but learned some foundations that are useful to my every-day code sessions.

May 2021
CSJB Arecibo

High School Diploma from Colegio San Juan Bosco Arecibo

Language
